

TOYNE TAILORED APPARATUS

Since the first unit was put into service in 1942, Toyne, Inc. has consistently delivered quality-built fire apparatus to departments across the nation. 2017 marks 75 years of building a reputation for manufacturing fire trucks that will be there when you need them the most. From yesterday to today, and into the future, Toyne Tailored Apparatus, have been, and will be, built to take the call, every time.

DUMP CHUTE OPTIONS

Engineered for the needs of your department, Toyne offers multiple dump chute options. Choose from stainless steel swivel dump, stainless steel dump valve with aluminum hinged chute, or stainless steel dump valve with electric chute and valve with option for in-cab controls. Toyne fire apparatus can also be outfitted with a three chute manifold system for the rear of the body.

PORTABLE TANK STORAGE OPTIONS

Toyne Tailored Apparatus are designed to hold 1000-3500 gallon portable tanks with steel or aluminum frames. Storage options include slide-in through tank, slide-in on edge, a Zico hydraulic rack with optional covering or manual portable tank racks.

BOOSTER REEL LOCATIONS

Booster reels can be notched in the upper rear corner of the tank with a hinge down door, above the pump in the dunnage area or in front of the hose bed, in any compartment specified by the department or under the cab depending on the chassis.

TANKER/TENDER

Toyne Tankers boast optimum maneuverability with a large carrying capacity, ensuring you get maximum water to a fire as quickly as possible. To ensure your apparatus meets your department's unique needs, Toyne offers a range of customizable options. Available in bolted/painted stainless steel, Toyne pump options include the Hale PTO 500, 750 or 1000 GPM, with tank sizes from 2000-3000 gallons. And for quick dumping capabilities, Toyne Tankers come with your choice of a swivel or three dump system.

RANDOLPH-HAMPTON - TANKER

A standard Tanker with an 1800-2300 gallon carrying capacity, this apparatus features multiple portable pump options and rear fill locations, booster reels, catwalk discharge, and ladder, suction hose and portable tank storage.

PUMPER TANKER/TENDER

Combining massive quantities of water with top of the line pumping capabilities, Toyne Pumper Tankers can battle the most intense blazes. Available in aluminum, bolted stainless steel or bolted/painted stainless steel, Toyne Tailored Apparatus customization options create a unit that performs precisely when and where you need it.

ISABELLA VFD - PUMPER TANKER

This bolted/stainless steel Pumper Tanker boasts a 2000 gallon UPF tank and a Hale Q Max 1750 GPM pump that makes high water flows a reality.

WETSIDE

The WetSide can be customized with a PTO 500, 750 or 1000 GPM pump, and either a 2100 gallon single axle or 3000 gallon tandem axle configuration. The treadplate body is available with either one or two compartments per side, and features portable tank and suction hose storage. Multiple rear fill options include a 2.5" or 4" with butterfly valve, or 2.5" or 4" Fireman's Friend valve.

ELLIPTICAL

With the Elliptical, your department has the muscle to take on any challenge. A driveline mid-ship pump from Hale, Waterous or Darley, or PTO pump with 750-2000 GPM capabilities take performance to the next level, while the UPF tank from 1800-3500 gallons with stainless steel wrap ensure your apparatus outlasts even the toughest fire. Additional features include one 60" wide compartment on each side, multiple side mount crosslay and tank fill options, suction hose storage and a three dump valve system.

PUMP PANEL LOCATIONS

Choose the pump panel location that best fits your needs. Pump controls can be in the driver front compartment for PTO pumps, side or top mounted, or compartment mounted for portable pumps.

LADDER STORAGE LOCATIONS

Intuitively designed ladder storage through the tank, in the hose bed or on the exterior of the body above the low side compartments maximizes your carrying capacity and puts more gear at your fingertips.

HARD SUCTION HOSE STORAGE

When drafting becomes necessary, it's critical for your hard suction hoses to be right at hand. Toyne offers hard suction storage options enclosed above the low side compartment, exterior mounted above each high side or low side compartment, slide-in from the rear or enclosed above the high side compartments.

HOSE BED LOCATIONS

On the side mount Pumper Tanker, hose bed storage comes standard above the pump with removable trays that slide out to the front of the pump. Also available is a driver or passenger catwalk hose bed with or without discharge to carry up to 200' of 1 3/4" hose, or optional 1 3/4" crosslays on removable trays for driver front compartment pump controls.
